Project Name	Rising Waters: AI-Powered Flood Risk Prediction System
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	 Awareness Identify Need & Collect Information	 Decision Analyze & Get Recommendation	 Outcome Take Action & Review Results
 Actions What does the customer do?	- Learn about Rising Waters platform through website / demo / team - Understand features and benefits - Explore how it helps in flood risk prediction	- Enter weather & environmental data - Review flood risk prediction - Analyze risk level and probability - Check recommendations	- Take preventive actions based on risk level - Share alerts with stakeholders - Monitor and track updates
 Touchpoint Where and how service do they interact with?	- Website / Landing page - Product demo / presentations - Social media / awareness campaigns	- Rising Waters Web Application - Dashboard & Analytics - Reports & Recommendations - Email / SMS Alerts	- Alert notifications - Reports & Downloads - Future risk updates - Support & Feedback
 Customer Thought What is the customer thinking?	- Can Rising Waters predict flood risk accurately? - Is my data safe and secure? - Will it be easy to use?	- Is the risk level reliable? - Which area is most at risk? - What actions should I take? - How can I reduce the risk?	- Did I take the right action? - Did it help reduce the risk? - Can I improve preparedness for next time?
 Customer Feeling What is the customer feeling?	- Curious - Concerned - Hopeful	- Focused - Confident - Informed - Alert	- Relieved - Satisfied - Prepared - Empowered
 Process Ownership Who is in the lead on this?	Awareness & Outreach Team	- Data Analyst & ML Model - System & Platform Team	- Disaster Management Team - End Users (District Officials, Communities)
 Opportunities How can we improve this stage?	- More awareness programs - Local language support - Interactive demos & tutorials	- Improve prediction accuracy - Better visualization & alerts - Faster recommendations - Mobile app & offline access	- Real-time updates & monitoring - Feedback loop for improvement - Integration with early warning systems
