

Project Demo Planning

Date	04 July 2026
Team ID	
Project Name	Rising Waters – AI-Powered Flood Prediction & Early Warning System
Maximum Marks	1 Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Project Overview	Introduce the project, objectives, team members, and explain the flood prediction problem being addressed.	2	Sasi Vardhan Reddy
2	Dataset & Machine Learning Model	Explain the dataset, preprocessing, model training, algorithms used (XGBoost, Random Forest, KNN, Decision Tree), and model selection.	3	Sasi Vardhan Reddy
3	Web Application Demonstration	Demonstrate the Flask application, user input form, and prediction workflow.	3	Sasi Vardhan Reddy
4	Live Flood Prediction	Enter sample values, generate a prediction, and explain the output displayed by the application.	3	Sasi Vardhan Reddy
5	Testing & Future Enhancements	Discuss testing, project outcomes, limitations, and planned future enhancements such as real-time APIs and early warning notifications.	2	Sasi Vardhan Reddy
6	Conclusion & Questions	Summarize the project, key achievements, and answer evaluator questions.	2	Sasi Vardhan Reddy

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for an AI-based flood prediction system and the project's objectives.
2	Solution Overview	Explain the need for an AI-based flood prediction system and the project's objectives.
3	Live Feature Demonstration	Demonstrate data input, flood prediction, and display of prediction results through the web application.
4	Q&A Session	Answer questions, discuss project limitations, and explain future enhancements.
